

Seeded Aperture Cards

These stylish, sophisticated looking cards are made from 240 gsm white or ivory cardstock printed with eco-friendly water based inks and are blank inside for your message. They have our trademark seeded water soluble paper cut in a square and mounted behind the shaped aperture in the front which allows the seeds to grow through when the front of the card is planted. Ideal for any occasion, the text on these cards can be customized for your special event or to match with existing stationery. Rear printing includes planting instructions and may also be customized to include a short message from you for an extra fee. Cards can be produced with a top or side fold in two sizes (8cm x 12cm and 16cm x 12cm).

How to Order

Choose cardstock colour, a short phrase for the front top of your card (e.g. Happy Birthday, You're Invited etc.) and a longer phrase for the front bottom. You can also request a specific font colour. Then choose an aperture shape and seed type from the list below

Seed Types

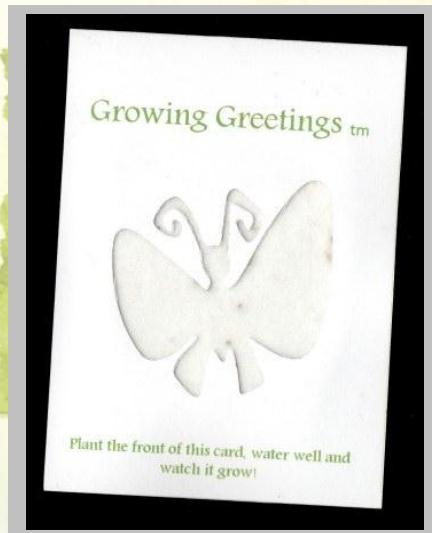

We can supply our aperture cards with the following seed varieties (other varieties available on request):

Virginia Stock, Ox-eye Daisy, Flanders Poppy, Forget-me-Not, French Marigold, Chamomile

Prices:
